Gm,

Since my last post the Privacy sector continued to outperform, hopefully you could capture some of the upside there.

Now let's talk about new trends.

The massive liquidations that happened two weeks ago served as a reset of leverage. The market sentiment index on Dexu went green for the 1st time after 6 months, which once again turned out to be a local bottom around btc \$104k, with many alts down 50% to 90%.

In terms of narratives, we are seeing a small shift and attention is moving away from Perps (thanks to liquidations) and Prediction markets to now:

1/ NFTs (thanks to Apefest event in Vegas and corresponding announcements)

2/ Tokenless projects (thanks to Monad, Polymarket and MegaETH)

3/ AI-Agents (thanks to a16z report)

In terms of new trends, probably the biggest one has been x402 and nft related event Apefest.

X402

x402 is a new open payment protocol developed by Coinbase that enables instant, automatic stablecoin payments directly over HTTP.

You can read more about it [here](#). Here is also a tldr from Dexu.

AI Alpha

Topic TLDR ⓘ

x402

Quickly, degens have created new shitcoins to ride this trend and Coingecko has even created a category for it.

Currently CT is going crazy about it as you can see here so there are some opportunities for degens.

As of now, I personally don't see much potential on this new meta in terms of token and see it as a forced short-term hype. However, for those of you who would like to give it a try, here are the accounts mentioning it the most. Check out their content for some shills:

AI Agents A16z report

AI Agents are the best performing sector in the last 7d.

I've shared this week about the A16z report and how it created a short-term bullish catalyst for AI agents [here](#) and [here](#).

If you haven't already, check out the a16z yearly report "State of Crypto 2025". They also published a Youtube video commenting it and you can find the TLDR of it and other videos commenting it on the Dexu new Youtube page.

\$VIRTUAL is the best performing token in the last 7d among our Sweet-Spot (good projects) index:

Virtuals Protocol [VIRTUAL]

Social Catalysts Market On-Chain KOLs

Bullish ⓘ

1. Virtuals Protocol integrates Robotics via 'SeeSaw' subnet on BitRobotNetwork to enhance real-world agent actions, leveraging crowdsourced egocentric video for training, aiming for an agent-powered economy with physical output.
2. Virtuals Protocol's native token \$VIRTUAL is now listed on Robinhood App, a major retail brokerage, potentially increasing accessibility and liquidity for the token to a broader audience.
3. Virtuals Protocol officially partners with Ethereum Foundation to co-host the 'Ethereum is for AI' hackathon, fostering innovation within the AI agent ecosystem on Ethereum.
4. Virtuals Protocol introduces a new 'Unicorn Launchpad' model for token launches, featuring 5% airdrops for veVirtual holders and ecosystem participants, a 45% public trading pool, 50% team allocation with vesting, and a decaying tax mechanism for fair distribution.
5. Virtuals Protocol's Agent Commerce Protocol (ACP) adopts EVM as its foundation, enhancing decentralization and security for AI agent interactions, enabling verifiable on-chain reputation and atomic flows for discovery, coordination, and payments.
6. Virtuals Protocol's agent tokens are now tradable on Coinbase, a significant listing that boosts accessibility and liquidity for various AI agents within the Virtuals ecosystem.

Bearish ⓘ

In terms of pre-tge projects, obviously you should be paying attention to:

- TGE time is approaching and airdrop opportunities will be abundant.

The screenshot shows a Windows desktop with a collage background of cryptocurrency logos and market share percentages. A window titled 'Portfolio 01' is open, displaying a grid of crypto assets. The desktop background includes logos for Solana, Ethereum, Base, Hyperliquid, and others, along with their respective market share percentages.

Cryptocurrency	Market Share Percentage
Solana	25.61%
Ethereum	18.43%
Base	12.70%
Hyperliquid	12.38%
BNB	8.31%

Monad TGE being closer, I'm sharing here the Monad projects with highest mindshare in the last 7 days so you can dyor.

That's all for today.

See you in the next edition!
